Borough Council

Towner Gallery

A new build 3 storey fair faced insitu concrete framed building built adjacent to a grade 1 listed operational Congress Theatre and alongside the National Tennis Venue of Devonshire Park. The works were carried out on a restrictive site requiring access to the theatre and major tennis events at all times. The works included construction of a link section between the Congress Theatre and the Cultural Centre.

The building provides conference facilities, new permanent gallery and storage, archiving, exhibition gallery, community space and catering/retail facilities.

The contemporary design produced by Rick Mather provides a perfect setting for the more traditional Towner collection.
